Join the Alzheimer's Association for a special conversation around tools and resources available to clinicians in California. This webinar will feature an overview of available resources to share with your patients, families and care partners and an introduction to our no-cost consulting services available for clinicians, practices, and health systems pursuing early and accurate diagnosis and quality dementia care. A description of a California-wide initiative focused on dementia will be provided, along with information on how to become involved. We will have a Q&A following the presentation.
